## God Dhanwantri & Ayurveda : Nature's Divine Gift to Humanity

**Lord Dhanwantri**, the Hindu god of medicine and an avatar of Lord Vishnu, is revered as the father of Ayurveda. He emerged from the ocean during the Samudra Manthan (churning of the ocean) carrying a pot of Amrit (nectar of immortality), symbolizing health, healing, and life. Worshipped by healers and Ayurvedic practitioners, Dhanwantri represents the divine power of natural healing and balance in the human body.

### Ayurveda : The Science of Life

Ayurveda, which means the "Science of Life," is a 5,000-year-old system of natural healing that originated in India. It believes that true health is achieved by maintaining balance between mind, body, and spirit, aligning with nature's rhythms and elements – Vata (air), Pitta (fire), and Kapha (earth/water).

### How Nature Helps Our Body:

1. Herbs as Healers: Natural herbs like Ashwagandha, Tulsi, Giloy, and Turmeric strengthen immunity, reduce stress, and fight inflammation without side effects.
2. Balanced Nutrition: Ayurvedic diet uses seasonal and local foods to balance doshas, improve digestion, and enhance vitality.
3. Detox & Rejuvenation: Natural therapies like Panchakarma help in cleansing the body, removing toxins, and restoring inner harmony.
4. Mind-Body Connection: Yoga, meditation, and herbal remedies work together to calm the mind, energize the body, and elevate the soul.
5. Prevention Over Cure: Ayurveda focuses on daily routines (Dinacharya) and seasonal practices (Ritucharya) to prevent illness before it begins.

In essence, Ayurveda guided by the wisdom of Lord Dhanwantri teaches us that nature is not separate from us—it is within us. When we live in harmony with nature, we unlock the body's innate ability to heal, grow, and thrive.
